

SUSSEX COUNTY LAND USE REFORM WORKING GROUP MEETING #7

WELCOME & INTRODUCTIONS

Sussex County

- Todd Lawson
- Vince Robertson
- Jamie Whitehouse
- Brandy Nauman

McCormick Taylor

- John Mullen
- Christina Arlt
- Jillian Dierks

Kramer & Associates

Andrew Bing

WORKING GROUP ROLE & DELIVERABLES

DEVELOP RECOMMENDATIONS THAT:

Implement smarter, sustainable development

Ensure growth is supported by infrastructure

Address affordable/workforce housing needs

Preserve farmland and natural resources

Prevent low-density, uncoordinated sprawl

WORKING GROUP ROLE & DELIVERABLES

- □ Welcome
- Meeting & Process Overview
- □ Draft Recommendations
- Questions & Final Thoughts
- □ Public Comment

MEETING SCHEDULE

- Meeting #8: **Tuesday**, August 5, 10:00am–12:00pm
- Meeting #9: Thursday, August 21, 10:00am–12:00pm

MEETING PROCESS OVERVIEW

Meeting #6 (July 10)

Confirm List of Draft Recommendations

Meeting #7 (July 24th)

Draft Recommendation Review

Meeting #8 (August 5)

Draft Recommendation Finalization

Meeting #9 (August 21st) IF NEEDED

Recommendation Finalization

MEETING PROCESS OVERVIEW

Understanding of Issues

Early Ideas & Best Practices

Draft Recommendations

Draft
Recommendations
Review

Recommendations

Meeting #7 (July 24th)

• Draft Recommendation Review

Meeting #8 & #9 (August 5 & 21)

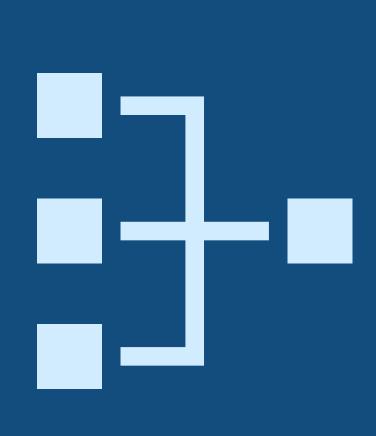

• Draft Recommendation Finalization

DRAFT RECOMMENDATION REFINEMENT

Over the last two months, we've taken steps toward identifying draft recommendations based on Working Group Input:

- Meeting #5: We introduced an initial batch of 10 draft recommendations.
- We followed up with **one-on-one conversations** to gather your **feedback**, **questions**, **and level of support** (on a scale of 1–5) for those draft recommendations.
- Meeting #6: We introduced an additional 12
 recommendations with the goal of bringing all the draft
 recommendations to the same level.
- Since the last meeting we have been revising, expanding, and combining the draft recommendations based on the feedback we received.

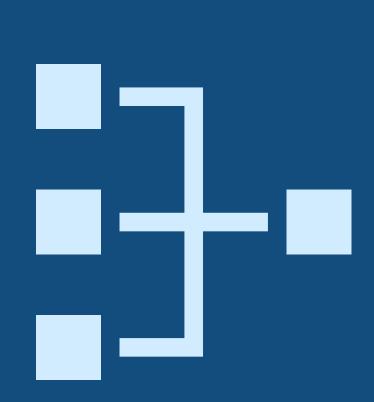

DRAFT RECOMMENDATION REFINEMENT

Today:

- We have a revised list of #17 draft recommendations. The draft recommendations, have been:
 - Combined where appropriate
 - Updated to include more depth and detail based on Working Group Member feedback
 - Reviewed by and refined by County Staff for feasibility and alignment with current processes.
- Confirm shared understanding of each recommendation
- Flag any remaining questions or concerns

Next Meeting:

Determine Working Group support for each recommendation

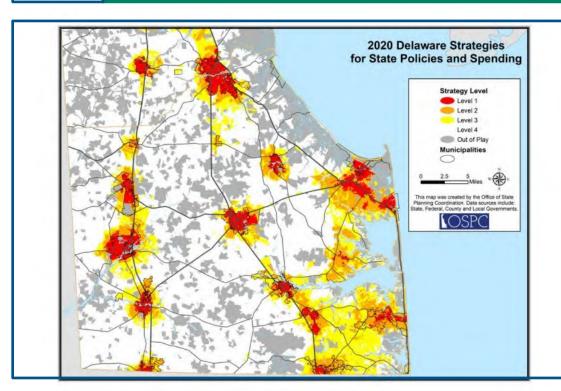

DRAFT RECOMMENDATIONS

1. Align Future Land Use Map

As part of the 2028 Comprehensive Plan Update, revise the Future Land Use Map (FLUM) within it, using the State Strategies for Spending as a guide, where appropriate, to designate the boundaries of the Growth Areas and the Rural Areas.

2. Comprehensive Rezoning

As part of the 2028 Comprehensive Plan Update, undertake a phased, countywide rezoning effort beginning with AR-1 Zoning District to align zoning regulations with current land use goals, infrastructure, and growth policies. The process should prioritize enabling housing diversity and affordability, distinguish between growth and preservation areas, and be supported by public engagement and implementation guidance.

Adopt codified criteria to evaluate rezoning applications in a transparent and consistent manner. These standards should be applied to map amendments and should support legally defensible, policy-aligned decisions. Criteria may include:

- A. Consistency with the Comprehensive Plan, including alignment with the Future Land Use Map and adopted policy objectives;
- B. Compatibility with Zoning District Intent;
- C. Environmental suitability of the site, including the presence of sensitive or protected natural resources that cannot be mitigated;
- D. Proximity of existing and planned supportive infrastructure.

3. Establish Clear Standards for Rezoning

4. Define Missing Middle Housing Types

Amend the Zoning Code to establish clear definitions for Missing Middle Housing types, including duplexes, triplexes, stacked flats, and cottage courts, as distinct from the current overly broad term "multifamily dwelling" in the Zoning Code. Definitions should allow flexible configurations (side-by-side or stacked) and support modular construction as needed. Revise the existing definition of "multifamily" to reflect these changes. These definitions lay the groundwork for expanded housing options in strategic areas.

Update Zoning Code Sections 115-37 (GR), 115-29 (MR), and 115-45 (HR) of the County Code to permit a broader range of housing types, such as duplexes, triplexes, townhomes, cottage courts, stacked flats, and multifamily buildings, within designated growth areas.

5. Permit Missing Middle Housing in Strategic Areas

Source: Opticos Design

6. Establish Bulk and Setback Standards for Missing Middle Housing and adjust height, building length and separation caps in growth areas

- A. Revise minimum lot sizes, widths, setbacks, and separation distances within growth areas to enable compact housing types in Zoning Code Sections 115-37 (GR), 115-29 (MR), and 115-45 (HR), 115-85 (M) 115-77 (C-1) and 115-83.2 (CR-1).
- B. Increase maximum building height for mixed-use and multifamily to 60 ft. in GR, MR, HR, CR-1, C1, C2, C3, and C4 zoning districts within growth areas to facilitate walkable, mixed-use, and multifamily development. Tailor height increases to context through use of design standards (e.g., stepbacks adjacent to low-density zones).
- C. Eliminate or reduce current building length caps for townhomes and multifamily structures in growth areas to allow for more flexible site planning and cost-effective housing types. Modify townhouse standards to allow up to eight attached units per building. Adjust required separation distances between buildings where appropriate to maintain access and setbacks while improving layout flexibility.

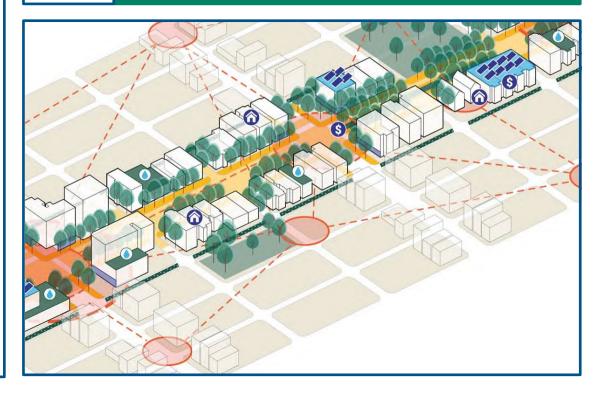

Update commercial zoning districts (CR1 and C1–C4) to allow walkable mixed-use redevelopment in designated growth areas/corridors with multimodal opportunities. Permit mixed-use structures and increase residential allowances to enable up to 60% residential use.

7. Modernize CR-1 to Support Mixed-Use Residential Corridors

8. Establish a Process for Phasing Coordination of Transportation Improvements

For major developments in designated growth areas, establish a formal process, coordinated with DelDOT and codified in the County code, to phase and sequence transportation improvements associated with the project alongside construction milestones. Phasing schedules should be submitted with final site plans and tied to building occupancy. This process should be aligned with adopted infrastructure standards.

9. Criteria for Growth Zones

As part of the next Comprehensive Plan update, establish priority areas and potential sub-categories within the Future Land Use Map (FLUM) based on infrastructure access and development suitability. Criteria should include but not be limited to:

- A. Location near municipalities, employment centers, and community services
- B. Proximity to public sewer and water (existing or planned)
- C. Access to transportation infrastructure and areas with coordinated planning (e.g., TIDs or transit routes)
- D. Capacity to extend or connect with compact and mixed-use development patterns
- E. Avoiding fragmentation of working lands, preserved lands and environmentally sensitive areas, where feasible

These priorities should inform future rezonings, infrastructure investments, and coordination with state and local partners, strengthening the role of the FLUM as the County's core land use tool.

10. Strategic Density Adjustments

Revise the base zoning district standards in growth areas to support targeted growth and infrastructure alignment. Specifically:

A. Increase base densities in designated growth areas by updating GR, MR and HR and appropriate commercial zoning districts (e.g., allow 8–24 units per acre), with revised dimensional standards to support compact residential and mixed-use development patterns.

10. Strategic Density Adjustments

- B. Authorize additional density above the base level only through an expanded Density for Bonus program (§115-22), which will:
 - 1. Be permitted in growth areas;
 - 2. Replace the current flat per-unit fee with a percentage-based contribution tied to total construction costs;
 - 3. Direct proceeds to a dedicated land preservation fund that prioritizes protection of farmland, forests, and high-value conservation areas located outside of growth areas, when possible in the same HUC-10 watershed as the receiving site.
- C. Revise bulk standards and/or reduce density in AR-1 outside growth areas to discourage sprawl, reduce the strain on the transportation network, and better preserve agricultural and natural lands.

11. Expand Sussex County Rental Program (SCRP) Program

Revise the Sussex County Rental Program (SCRP) to improve effectiveness and increase developer participation through a data-informed, phased approach:

- A. Amend the program structure to:
 - 1. Reduce the affordable unit set-aside from 25% to 15%
 - 2. Distribute units across three AMI tiers: 5% at 60% AMI, 5% at 80% AMI, 5% at 100% AMI
- B. Consider additional adjustments
 - 1. Reduce open space requirements (e.g., from 50% to 30%)
 - 2. Offer impact fee reductions proportionate to the share of affordable units (e.g., for TID fees, sewer connections)
 - 3. Align rent calculation methodology with DSHA's Mixed Income Market Fund
- C. Potential next step to include exploring opportunities to pilot homeownership incentives, such as allowing density bonuses tied to sale price caps (e.g., 10% of units affordable to 120% AMI buyers)

12. Tree Preservation

Promote the retention of existing trees by enacting value-based tree preservation requirements including mitigation options and incentives to promote preservation.

A. Utilize the existing "Forest" definition:

"For the purposes of this subsection, Forest shall mean: A vegetative community dominated by trees and other woody plants covering a land area of 10,000 square feet or greater. Forest includes: (1) areas that have at least 100 trees per acre with at least 50% of those having a two-inch or greater diameter at 4.5 feet above the ground and larger, and (2) forest areas that have been cut but neither stumps were removed nor the land regraded."

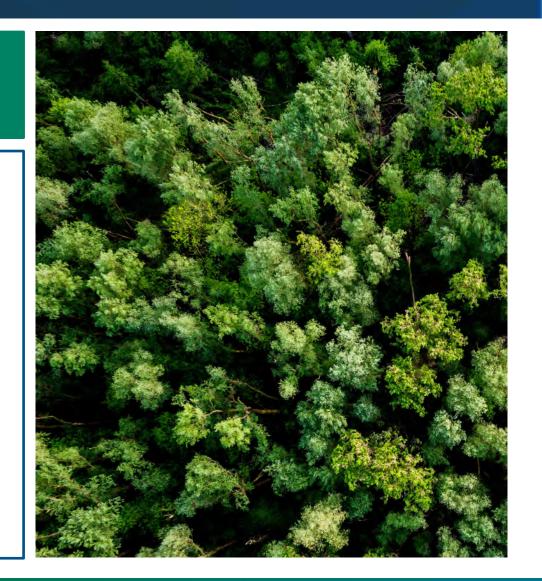

12. Tree Preservation

- B. Provide minimum standards for retention based on the forest location.
 - 1. Inside growth area: Forest shall be protected at a minimum percentage of 30%
 - 2. Outside growth zone: Forest shall be protected at a minimum percentage of 50%
 - 3. Retention requirements do not apply to lands actively managed for the cultivation and harvest of trees as a crop

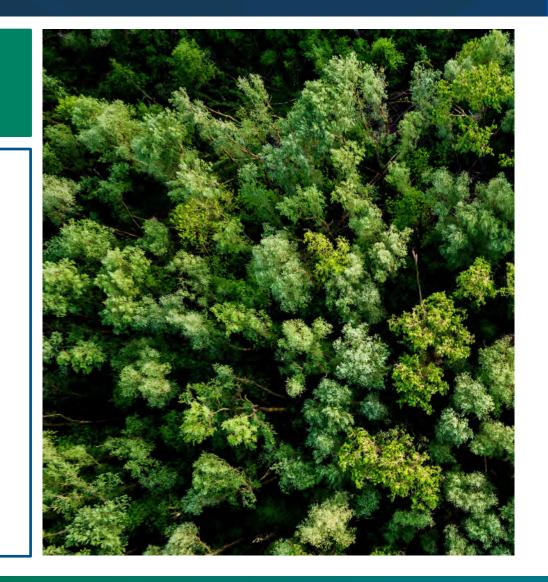

12. Tree Preservation

- C. Tree Mitigation: Forests may be cut or cleared over a greater area than permitted only if mitigation is provided.
 - 1. Trees shall be mitigated at a rate of 1.5 replacements for every 1 removal within the growth zone, and 2 replacements for every 1 removal outside the growth zone
 - 2. Mitigation is encouraged to be contiguous to existing forest stands to promote the existing ecology and habit value of existing forest stands.
 - 3. No mitigation is required for the removal of trees that are not contiguous to a defined forest and are under 6" in diameter, or any other non-native or invasive species.

13. Naturalized Stormwater Basins in Preserved Open Space

Encourage naturalized landscaping and native vegetation in stormwater basins located within preserved open space, where site conditions and regulatory standards permit. The County should coordinate with the Sussex Conservation District to identify opportunities to support habitat-friendly design features, such as native plantings, pollinator zones, and low-mow areas, in basins that serve dual roles as stormwater management infrastructure and passive open space. This recommendation is intended to support existing trends and complement state standards, not override technical requirements or design constraints.

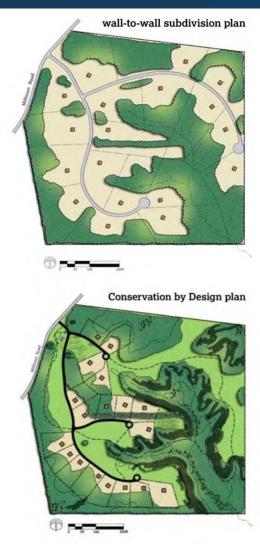

14. Refocus Subdivision Design Around Conservation Priorities

17. Require clustering for all major subdivisions in AR-1 zoning outside designated growth areas and increase the minimum open space requirement to 50% and reduce minimum lot size requirements to 5,000 sq. ft. for single-family homes, to support reduced land consumption and promote more flexible, conservation-first development.

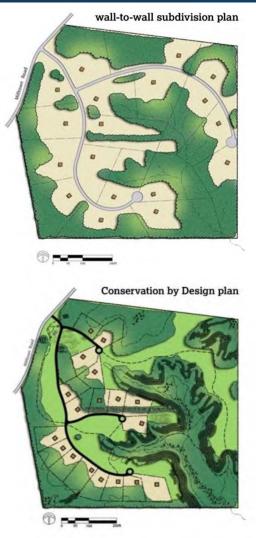

Source: Natural Lands Trust

Focus Subdivision Design Around Conservation Priorities

Enhance the existing 4-step subdivision design process by defining priority natural resources (e.g., mature forests, habitat corridors, historic/scenic views), requiring early coordination with either Sussex County Land Trust or planning staff, and clarifying expectations for identifying and preserving contiguous, ecologically valuable open space. Lot placement should reflect clear avoidance of sensitive features, and preserved areas should be integrated into subdivision layouts to support long-term ecological function and, where appropriate, passive community use.

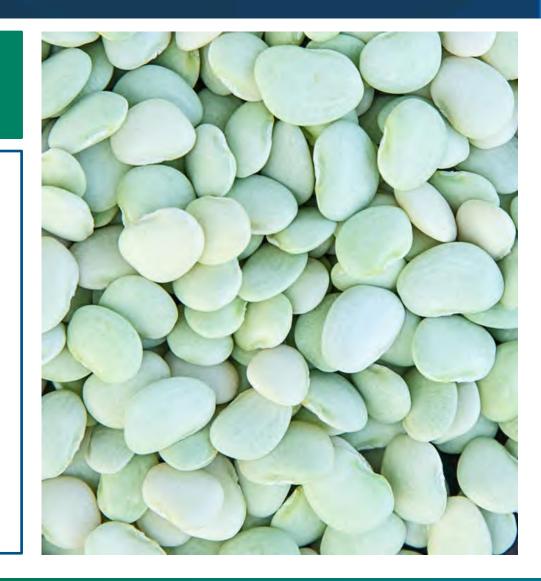

Source: Natural Lands Trust

15. Support Working Farms Through Permitted Agricultural Support Uses

Support the viability of working farms in AR-1 zoning outside designated growth areas by permitting commercial agricultural support uses, such as processing facilities and equipment repair, subject to performance standards. Review and revise outdated zoning procedures (e.g., Board of Adjustment requirements) that may duplicate state oversight.

DRAFT WORKING RECOMMENDATIONS - PRESERVATION

16. Complete adoption of a Master Plan Zoning Ordinance for Large-Scale Development

Complete adoption of the drafted Master Plan Zone ordinance to enable coordinated, mixed-use, and infrastructure-supported developments that align with County goals. This zoning tool can help guide large-scale development through a phased, Comprehensive Planaligned process.

Source: Bayside, Delaware, Parker Rodriguez

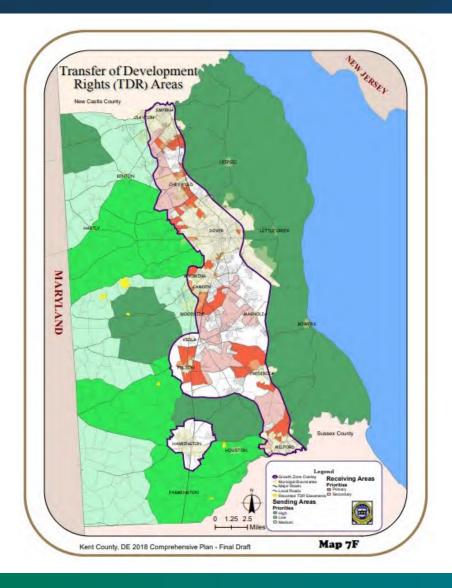

DRAFT WORKING RECOMMENDATIONS - PRESERVATION

17. Explore a Transfer of Development Rights Program

Review TDR programs to enable voluntary transfer of development rights from conservation-priority areas to designated growth zones with sending/receiving areas.

DISCUSSION

WRAP UP

MEETING SCHEDULE

- Meeting #8: <u>Tuesday</u>, August 5, 10:00am–12:00pm
- □ Meeting #9: Thursday, August 21, 10:00am–12:00pm
