Adminis-
trator's
Report

Mr. Stickels, County Administrator, reviewed the following information included in his Administrator's Report:

1. Public Notice - Sussex Shores Water Company - A Public Notice has been received that Sussex Shores Water Company has filed a petition with the Public Service Commission for a general rate increase and a change in service charges. Dates and locations of the scheduled public hearings were made available.
2. Transfer Station Permits - To date, 1,285 transfer station permits have been issued. It was anticipated that 6,000 permits would be issued. The ordinance requires all users of the transfer stations to have a permit by September 1, 1991.

Councilman Cole suggested that an ad be placed in the local papers in mid-August as a reminder to the residents of the County that the permit would be required after September 1, 1991.

West
Rehoboth
Expansion
Facility
Plan

Mr. Wood, County Engineer, discussed the West Rehoboth Sanitary Sewer District Facility Plan. The Final Draft of the Facility Plan for the West Rehoboth Expansion of the Dewey Beach Sanitary Sewer District is now ready for release and comments. A Public Hearing has been scheduled for August 28, 1991, in the Little Theatre, Cape Henlopen High School, Kings Highway, Lewes, starting at 7:00 p.m. The State requires a Preliminary Report be made when monies from the State Revolving Plan are being considered. It was emphasized that cost estimates are only available at this time.

West
Rehoboth
Expansion
Facility
Plan
(Con't.)

Members of the West Rehoboth Expansion Facility Plan team present for the meeting included: James R. Thomas, Jr., George, Miles and Buhr; Peter Bozick, George, Miles and Buhr; Paul Schwartzberg, The Whiting-Turner Contracting Company, Inc.; and, Ronald Matthews, Project Coordinator, Engineering Department. DNREC had the opportunity for input in the preliminary report and Gerard Esposito, Deputy Director, Water Resources, DNREC, was present.

Mr. Bozick, George, Miles and Buhr, reviewed the summary and recommendations of the Final Draft. The recommendations were summarized as follows:

1. The design flow of the wastewater treatment plant should be 4.3 mgd, corresponding to the year 2014 summer maximum month flow generated in Phase I and II.
2. A conventional gravity wastewater collection system should be utilized, with pump stations as necessary to transmit the flow to the treatment plant.
3. The recommended wastewater management alternative for the West Rehoboth area is Slow Rate Land Application with Higher Treatment. The estimated project cost for this alternative is \$75,041,000, in current day dollars, which includes capital costs, land, and engineering, legal and administrative costs.
4. The recommended alternative should be implemented by developing only those land application sites required for the first five years (to year 1999). Concurrently, a pilot scale constructed wetlands should be constructed at the proposed plant to obtain operating data and assess performance. The feasibility of expanding the land application system, or converting to a surface water discharge utilizing a constructed wetland for treatment, should be made following evaluation of the performance at the constructed wetlands.

By developing only those land application sites required for the first five years, the initial project cost is reduced to \$72,136,000. This represents an initial project cost savings of \$2,905,000.

Based on the results of the pilot scale constructed wetlands evaluation, the feasibility of converting the plant to a surface water discharge using constructed wetlands should be determined. The decision should then be made to expand the facility to the full 4.3 mgd capacity utilizing spray irrigation or a constructed wetlands with a surface water discharge.

Plan
(Con't.)

5. A combination of funding sources should be used to achieve equity considerations and minimize the financial impact on end users of the system. The County should take full advantage of available State Revolving Fund Loans. Revenue bonds can be used for the remaining funding needs.
6. Based on the engineering and cost estimates developed, planning level annual service charges of \$605 and planning level annual assessment fees of \$5.10/foot are required to meet net operating and capital requirements of implementing the recommended alternative. When planning level annual service charges and annual assessment fees are considered in total, a typical single EDU with a 65 front foot assessment will pay estimated annual charges of \$936.50 in the West Rehoboth area.

Again, cost estimates were discussed. Costs can go up or down depending on financing, rate of financing, land costs, and many other variables. The estimates given provide only a starting point and will be flushed out and modified after the Public Hearing.

Mr. Gerard Esposito, Deputy Director, Water Resources, DNREC, commended the County for the work that is being done on the West Rehoboth Expansion and the effort that is being made to stay on target with the schedule set forth in the Memorandum of Understanding. DNREC's two primary objectives, as stated by Mr. Esposito, are to keep costs down and get the job done. However, he encouraged Council to reconsider privatization and to study claims by private contractors that costs could be lower by utilizing this approach.

Future
Sewer
Assess-
ments

Councilman Cole asked if it is within our jurisdiction to levy a special assessment on future sewer districts as outlined in the South Coastal Area Planning Guide. Mr. Bayard, County Attorney, will investigate the legality of such action and report his findings in September.

Planning
and
Zoning
Issue

It was the consensus of the Council that the County Administrator be directed to send a memo to the Planning and Zoning Director seeking the Commission's recommendation concerning the adoption of a policy that would require a site survey be given to the Planning and Zoning Department before a certificate of occupancy is issued. It was Council's opinion that this would eliminate future problems with people going before the Board of Adjustment asking for a variance from property setback requirements. The next scheduled meeting of the Commission is August 8, 1991.
